FOR DETAILS

**MS. SIVASANKARI
TRAINING CO-ORDINATOR
PH: 24462337 / 2338 / 2250
EMAIL: training@valueadded.in**

Why IQC / EQAS

Quality Control is the process that provides evidence that a given Quality Control Material, when correctly applied, produces results that are fit for purpose. No matter how well a Quality Control performs elsewhere, analysts need to confirm that the Quality Control is valid when applied in their laboratory. There is now much greater emphasis on Quality Control in medical testing laboratories of late as all labs are keen to implement Good Laboratory Practices.

Training Topics

A full day hands on training session will address the following areas in IQC / EQAS:

- Why should you run IQC in your Lab ?
- What is precision, SD, CV, Systematic Error, Random Error ?
- What are the requirements of NABL with respect to IQC ?
- How do you estimate your Lab Mean for IQC ?
- What should you know about L-J Charts ?
- How to identify QC Rule Violations ?
- How to correct Outliers in IQC ?
- How to interpret EQAS Results ?

Course Fee & Payment Details

**Rs.2500/- per candidate favoring
Value Added Corporate Services P Ltd**

WHO SHOULD PARTICIPATE?

This course is designed for Laboratory Technicians, Biochemists, Lab Supervisors, Lab Managers and Medical Consultants etc who are involved in Quality Control Testing / Lab Operations. Both Hospital attached labs and independent labs can participate in the same.
