Why NABL 112

NABL has revised the specific criteria document recently based on ISO 15189:2012 standard requirements. The new document comes into effect from 1st April 2017

This new NABL 112 document supersedes the NABL 112 3rd Issue

All Medical Laboratories either applying for accreditation from now on or NABL applicant laboratories & laboratories awaiting surveillance or recertification assessment are to conform to this new NABL 112 document requirements

Who Should Attend

It will be an informative & useful session for Lab Managers, Quality Managers, Lab Directors, Senior Technical staff of all the departments to implement the NABL 112 requirements in their laboratories

Training Take Aways

The session will cover all the changes in the management requirements & technical requirements of the ISO standard

In addition, specific changes with respect to the following departments will also be addressed

- Clinical Biochemistry
- Clinical Pathology
- Hematology
- Microbiology & Infectious diseases serology
- Histopathology
- Cytopathology
- Cytogenetics
